

BULLETIN

BULLETIN NO.: 67-20

May 5, 2020

TO: ALL EMPLOYEES

SUBJECT: **SUSPENSION OF OVERNIGHT PASSENGER SERVICE**

Effective May 6, 2020 and continuing seven days a week until further notice, customers will not be permitted to enter the system between 0100 hours and 0500 hours so that subway cars and subway stations can be more thoroughly cleaned.

- All Service Delivery employees will report to their assigned reporting locations at their scheduled times, unless otherwise directed by management/supervision or supplement schedule.
- Specific intervals have been designated as “last trips” on each line. Every interval that departs a terminal in passenger service will continue making all scheduled station stops to its scheduled destination. After 0100 hours, customers will not be permitted to enter the system; however, they will be permitted to transfer to overnight shuttles, and they will be permitted to exit the system. On overnight shuttle services – Dyre Avenue, Lefferts Blvd., Rockaway Park, Metropolitan Avenue, Franklin Avenue, and 95th Street/Bay Ridge – the last shuttle train will connect with the last adjacent mainline train operating through.
- Every line that operates during the overnight period (including shuttles) will continue to operate as per the timetable or supplement schedule in effect with all scheduled intervals between the “last train” in passenger service and the “first train” in passenger service operating “LITE” as “Fire Watch” trains. They shall be utilized to move essential NYCT employees and NYPD/MTA Officers from station to station. Every “Fire Watch” train will be crewed with a Train Operator and Conductor and will operate in accordance with all applicable operating rules, unless explicitly stated otherwise.
- After 0100 hours and upon arrival at terminals, all trains that had been in passenger service must be discharged of all passengers. Service Delivery personnel must ensure that all trains are cleared of passengers prior to being dispatched “LITE.” NYPD Officers have been assigned to enforce the Rules of Conduct.
- All trains operating between 2200 hours and 0600 hours, including all trains that are operating in passenger service and all trains that are operating “LITE” must be held to their scheduled departure times at all locations, including terminals and gap stations. This is especially important for the last scheduled intervals in passenger service on each respective line, and for the first intervals when the system reopens at 0500 hours. **It may be necessary to delay some terminal departures to facilitate the completion of the cleaning process; train crews should follow the direction of terminal supervision at all times.**
