Rapid Transit Operations

May 2010

Caution Saves Lives

As of March 11, there have been 31 12-9's in 2010. **31 people have been killed or injured by subway trains. 31 crews have had their lives disrupted.**

None of the 12-9's was the fault of the train crew. But some of them might have been avoided if trains came into the stations more slowly.

We want to reduce the number of deaths and injuries in the subway. We want to reduce the number of crews traumatized by something they had no control over.

Do NOT enter a station at full speed.

Operate with caution — especially if the platform is crowded. When the TD or ATD asks where you lost your time, say you were preventing 12-9's and name the stations. If supervision pushes you to go faster entering stations, let us know who and where.

Save lives — Operate with caution entering stations.

RTO reps can be reached at:

TWU Union Hall — 212.873.6000 ask for RTO

2 Broadway — 646.252.5549

130 Livingston — 718.694.4212 or 4168
