

## Automatic Refills help you to stay on track

## Receive refills before running out with Express Scripts' automatic refills program.

**Enrolling in automatic refills** gives you the peace of mind that your prescription will be automatically refilled and mailed to you before you run out. We will notify you two weeks before the refill date to let you know that your refill is about to be processed. You'll still have time to notify us if you wish to change the shipping date.
