

# Why Should I Care?

“ I definitely believe climate change is affecting our transit system. We have very intense storms. They don't have to last very long and all of a sudden they're knocking out power and systems. Just last week we had a big storm in Queens, and it knocked out service in Manhattan on the N, R, and Q Lines. I've always been aware of climate change and how it's affecting not just New York City but the world. TWU is going to be at the Peoples Climate March. I want to be sure we're there and union strong. ”

— Roxanne Coombs, Subway Conductor,  
New York City Transit

Join union members, environmentalists, and our communities at the People's Climate March  
Sept 21 2014 , Location TBD

To join us, Text the word  
**'CLIMATE'** to 313131
