

# **World Trade Center Cancer Deadline Approaching**

**National Institute of Occupational Safety and Health  
(NIOSH) has linked 67 cancers\* to the toxic dust**

**• October 12, 2014 is the last day to register a claim •**

Please tell your friends and neighbors who lived or worked south of Canal Street between 9/11/01 and 5/30/02 of the deadline. Don't let anyone diagnosed with a WTC cancer miss the deadline to register with the Zadroga 9/11 Victim Compensation Act

\*The most common cancers linked by the NIH and the WTCHP are cancers of the lungs, esophagus, kidneys, prostate, lymphoma, leukemia, and thyroid.  
Get yourself checked out!

If you or anyone you know was in NYC after the 9/11 attacks and have been diagnosed with any of the 67 WTC linked cancers, there is a presumption by NIOSH and the WTCHP that your cancer was caused by the toxic dust. You may be entitled to compensation for your illness and lost income.  
Learn your legal rights. Please call us today.
