

NYC CLC-NYCOSH 2012 SAFETY & HEALTH SERIES

Diesel Fumes:

Illnesses among workers and community members resulting from exposure to diesel fumes have long been documented. However, recent studies have demonstrated that diesel fumes are carcinogenic. However, there are very few safety standards that deal with this hazard; nor is there a prospect of an OSHA standard in the near future. This forum will examine the hazard and discuss its dangers and what can be done to minimize exposure, limit emissions.

Tuesday, November 13, 2012

10:00am – 1:00pm

UAW Region 9A
